The success of A Brief History indicates that there is widespread interest in the big questions like: Where did we come from? And why is the universe the way it is? I have taken the opportunity to update the book and include new theoretical and observational results obtained since the book was first published (on April Fool's Day, 1988).

brief but dismayingly tenuous. It is a curious feature of our existence that we come from a planet that is very good at promoting life but even better at extinguishing it. The average species on Earth lasts for only about four million years, so if you wish to be around for billions of years, you must be as fickle as the atoms that made you.
