Our products and premier solutions provide for characterization and modeling of cutting-edge CMOS and compound semiconductor devices. Keysight is the only vendor that provides complete end-to-end modeling solutions, from automated measurements, accurate device model extraction, comprehensive qualification to final process design kit (PDK) validation.

Three dimensional process and device modeling is now essential for advanced technology simulations but to be useful a number of limitations needed to be overcome including poor robustness of 3D meshing and structure creation, and long simulation times.
