

advances in disease vector pdf

GLOBAL VECTOR CONTROL RESPONSE v Foreword Technology and innovation have provided us with many advances which have improved the health of societies around the world.

Untitled-3 [apps.who.int]

Vector control. Current vector control interventions involve the use of insecticides either through sequential aerosol spraying technique (SAT); ground spraying; insecticide-treated targets or insecticide-treated animals – live baits; the use other-baited traps or screens, and the sterile insect technique (SIT).

WHO | Vector control

Viral vectored vaccines, particularly using vectors such as adenovirus, herpesvirus and poxviruses, are used widely in veterinary medicine, where this technology has been adopted much more quickly than in human medicine.

Recent advances in viral vectors in veterinary vaccinology

DEEP EHR: A SURVEY OF RECENT ADVANCES IN DEEP LEARNING

The fecal–oral route (also called the oral–fecal route or orofecal route) describes a particular route of transmission of a disease where pathogens in fecal particles pass from one person to the mouth of another person. Main causes of fecal–oral disease transmission include lack of adequate sanitation (leading to open defecation), and poor hygiene practices.

The Capability Approach: Its Development, Critiques and

Key properties of a viral vector. Viral vectors are tailored to their specific applications but generally share a few key properties. Safety: Although viral vectors are occasionally created from pathogenic viruses, they are modified in such a way as to minimize the risk of handling them. This usually involves the deletion of a part of the viral genome critical for viral replication.

INTRODUCTION. Rift Valley fever (RVF) is a disease of domesticated livestock that is frequently transmitted to humans. RVF virus (RVFV; of the Phenuiviridae family, formerly Bunyaviridae) is currently endemic in many regions of Africa and is transmitted by a range of mosquito species (). Prominent instances of emergence of RVFV in new areas (such as Egypt in 1977–1978 and Saudi Arabia in 2000 ...

PLF works for animal welfare through a variety of devices, including automated tools that integrate audio- and video-captured data for early disease detection and warning systems (). The sound and image data is analyzed by animal experts into a database used for creating suitable algorithms, .. A technology called Flockman is a recent and innovative feed control system for broiler chickens.

Recent advances in wearable sensors for animal health

Despite undoubted health advances in many areas, poor health continues to be a constraint on development efforts. In some cases the process of development itself is creating conditions where,
