A tale of two travelers who turned a family visit into an expedition to see the Great American Eclipse of 2017.

Astronomy Net – Astronomy tales from affable amateur

Astronomy (from Greek: ἀστρονομία) is a natural science that studies celestial objects and phenomena. It applies mathematics, physics, and chemistry in an effort to explain the origin of those objects and phenomena and their evolution. Objects of interest include planets, moons, stars, galaxies, and comets; the phenomena include supernova explosions, gamma ray bursts, and cosmic ...

University of Rhode Island Planetarium April 2013: By Francine Jackson Nestled quietly on the corner of Upper College Road and Engineering Row is a unique little building resembling a silo stepped on by the Jolly Green Giant. Many students who pass by this building have no idea they are looking at one of the most modern planetariums in the area.
