insects and will provide experience and develop abilities in the identification of insects. Labs also include a wide variety of demonstrations that supplement lecture topics. Attendance at all lectures is mandatory. Attendance for the full laboratory period time is mandatory. A personally

Required Photographic Atlas of Entomology and Guide to

This is a great introduction and guide to the understanding of insects. As the title says, it is an atlas, not an encyclopedia; it provides a beautifully illustrated (photographically) basis to understanding the fundamental aspects of insect taxonomy. It is a 'what and why' guide to types and classifications.

Amazon.com: Customer reviews: Photographic Atlas of

Despite bringing together over 25 years worth of images to compile this photographic atlas of insects, justly representing the millions of subjects that comprise this extremely diverse group photographically is an enormous task. To cover enough forms for even an introductory course in insect identification is difficult.

Classification of Insect Orders (from Wheeler et. al., 2001) Order Name Common name Adult mouthparts Wings (no. and type) Protura Proturans Chewing Lacking

Classification of Insect Orders - UF/IFAS

insects contribute to blood flow, including flow through wing veins. The role of blood in insects is the transport of nutrients, wastes, and hormones. It is NOT the primary means of moving oxygen and carbon dioxide. (There is no hemoglobin in insects except in immature Chironomus spp. and a few others.) Reproductive system:
