I think retraction of papers that report uncorrected statistics is a bit much to ask for; after all, most of the results that were published in the days before rigid statistical corrections were common have turned out to replicate, and indeed large-scale meta-analyses have shown a good degree of consistency, at least in the sets of regions that activate for broad task contrasts.

In response to those who complained in my recent post that linear trends are not a good way to compare the models to observations (even though the modelers have claimed that it's the long-term behavior of the models we should focus on, not individual years), here are running 5-year averages for ...

STILL Epic Fail: 73 Climate Models vs. Measurements

A lot has been written about the need for public debate between alarmists and skeptics on the science of climate change. Earlier this month there was an actual debate, at the Colorado State University, Pueblo, Colorado.

by Javier Summary: Modern Global Warming has been taking place for the past 300 years. It is the last of several multi-century warming periods that have happened during the Neoglacial cooling of the past 3000 years. Analysis of Holocene climate cycles shows that the period 1600-2100 AD should be a period of warming. The evidence!

A diacritic " also diacritical mark, diacritical point, diacritical sign, or accent " is a glyph added to a letter, or basic glyph. The term derives from the Ancient Greek διακριτικός (diakritikós, "distinguishing"), from διακρίνω (diakrínō, "to distinguish"). Diacritic is primarily an adjective, though sometimes used as a noun, whereas diacritical is only ever an ...

Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...

Here are a few interesting recent papers I've read over the past few months. Bear in mind that Shane Legg, co-founder and chief scientist of Deep Mind, said publicly a few years ago that there's a 50% probability that we will achieve human level AI by 2028 and a 90% probability by 2050.

A panoramic window to the cosmic spectacular that contradicts the Big Bang. Big Bang cosmology was developed on features of the universe that could be seen with telescopes through light emitted in the visible part of the electromagnetic spectrum, a narrow band less than one octave with wavelengths between 390 and 700nm.

In a 1970 NASA Technical Note Infinite Periodic Minimal Surfaces Without Self-Intersections (p.38 ff), I described how skeletal graphs can be used to represent TPMS. More recently David Hoffman and Jim Hoffman (no relation) have demonstrated in their Scientific Graphics Project that for the TPMS P, G, D, and also for a fourth surface (I-WP) of genus 4, there is a striking connection between ...
