Download this article in .PDF format. Jointing is a basic function of engineering. For example, bolting two parts together can involve material properties and loading forces.

What's the Difference Between Bearing, Shear, and Tear-Out

Human factors and ergonomics (commonly referred to as human factors) is the application of psychological and physiological principles to the (engineering and) design of products, processes, and systems. The goal of human factors is to reduce human error, increase productivity, and enhance safety and comfort with a specific focus on the interaction between the human and the thing of interest.

Human factors and ergonomics - Wikipedia

The Classification Tree Method is a method for test design, as it is used in different areas of software development. It was developed by Grimm and Grochtmann in 1993. Classification Trees in terms of the Classification Tree Method must not be confused with decision trees.. The classification tree method consists of two major steps: Identification of test relevant aspects (so called ...
